Make your shiny future in “Japanese”

## Educational goals & philosophy

Chairman: SHINJI MATSUO

Aile academy was established to help international students acquire 'firm Japanese' and 'usable Japanese'.

And we also want them to use their Japanese language skills to become people who can play an active role in Japanese and international society.

Furthermore, we will teach them to understand not only the 'language' but also 'Japanese culture'.

## Course introduction

### University Prep. 1 year course

This course is for students who enter in April each year and study Japanese for one year before going on to university, junior college or vocational school, etc. This course is suitable for students who have mastered the Japanese Language Proficiency Test (JLPT) N3 or above in their home country by the time they arrive in Japan.

1 year is a short period of time, but we support students to understand Japanese culture and customs so that they will have no problems when they enter higher education.

### University Prep. 2 years course

This course is for students who enter in April each year and study Japanese for two years before going on to university, junior college or vocational school, etc. This course is designed to enable students to improve their Japanese language skills over a two-year period by learning the four skills in a well-balanced and deliberate manner.

### University Prep. 1 year 6 months course

This course is for students who enter in October each year and study Japanese for one year and six months before going on to university, junior college or vocational school, etc.

This course is suitable for students who have completed 12 years of education and are planning to study in Japan shortly afterwards.
